

Habirox[®]

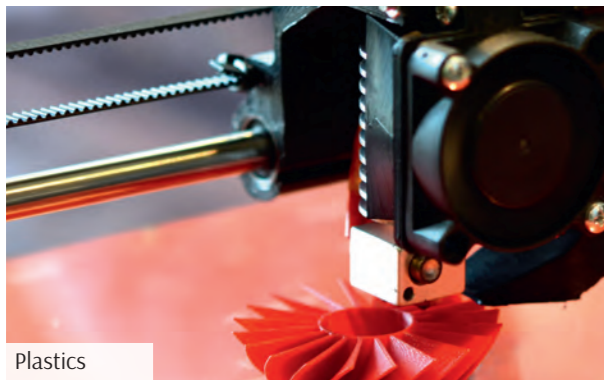

Synthetic iron oxide and chrome oxide pigments

Some of the most widely used high quality colour pigments

Habirox® is the brand name for Habich's iron oxide pigments. Habich offers yellow, red and black iron oxide pigments as well as chrome oxide green pigments.

Habirox® is a range of economically attractive pigments characterized by their outstanding fastness to light and weather. In combination with their excellent chemical resistance and exterior durability, Habirox® can be used for a variety of applications.

Main fields of application

Plastics

Artist paints

Packaging

Concrete

Coatings

Building chemical products
